FEATURED PROJECTS

Rate The Throne – This application was built in a team environment using Agile methodologies and mob programming. Technologies include Google Maps API, AngularJS, and HTML + CSS. Check it out <http://www.kendrickweatherapp.surge.sh/> or see the repo on GitHub.

Weather App – This application uses Google Maps and Open Weather API to plot several cities and provide the current weather as well as the five-day forecast. Check it out <http://www.kendrickweatherapp.surge.sh/> or see the repo on GitHub.

Canvas Game – This game was built using HTML Canvas and JavaScript through Object Oriented Programming. Check it out at <http://www.kendrickcanvasgame.surge.sh/> or see the repo on GitHub.

Movie App – This app allows you to search for your favorite movie and pull up the details! This app was built using Ajax to access a movie API. Check it out at <http://www.kendrickmovieapp.surge.sh/> or see the repo on GitHub.

Blackjack Game – This application was built using HTML, CSS, and JQuery. This game also contains a betting feature and computer player. Check it out at <http://www.kendrickblackjack.surge.sh/> or see the repo on GitHub.
