PROJECTS

GLUTEN TRACKER MOBILE APP: Mobile App to help find Gluten Free Grocery Options

Technologies: HTML, CSS, JavaScript, Angualr.js, Ionic, Node.js, Express.js, PostgreSQL

I resolved the issues of finding hidden gluten in ingredient lists on grocery items.

I used Ionic to scale up a mobile application. The biggest hurdle was learning a new framework.

I integrated a barcode scanner using the phone's camera. I also created a custom function using regular expressions, to parse through the ingredient data.

After scanning a barcode, a call is made to the Nutritionix API. The ingredients are then parsed and checked against my database of gluten containing ingredients.

The backend runs for both the sister web page for the app as well as the mobile app.

HIIT TRACKS MOBILE APP: Mobile App that allows to workout using an interval timer and sound ques.

Technologies: HTML, CSS, Ionic, Angular.js, JavaScript
This was a team project using SCRUM methodologies. A problem that we encountered early on was learning the page routing and caching in ionic. We also learning the importance of testing the application on the phone during the early phases of development rather than later.

E-COMMERCE COFFEE SITE: Full Stack E-commerce Subscription Coffee Site

Technologies: HTML, CSS, JavaScript, Node.js, Angular.js, MongoDB, Express.js

I began with the backend, using Node.js and MongoDB, first to simulate designing an API. I had to resolve the issue of password protection for customers. I used a node module called bcrypt. A problem that I had to overcome was using Mongoose to add validations on the data that would be added to the database.

The frontend was built from pdf images using Angular.js for seamless page navigation and Bootstrap for responsiveness.

EXPERIENCE

OFFICE ADMINISTRATOR: WoodmenLife, 2013 – 2016
- Recruit Onboarding and Software Training for new Sales Representatives
- Email Management and Client Communication
- Daily assistance with Sales Representative requests + CMS
- Ran social media campaigns for Facebook and Twitter
- Administrative + Expense Reports

HAIR STYLIST: Sweet Georgia Brown Hair Salon, 2009-2013
- Ability to give attention to detail during consultation, provide professional suggestions, and deliver client's requests.
- Built clientele to a sustainable level
- Client Satisfaction and Trust
- Product Sales

EDUCATION

DIGITALCRAFTS: Atlanta GA, 2016

SKILLCRUSH WEB DEVELOPER BLUEPRINT: Certificate, Online 2015

ATHENS TECHNICAL COLLEGE: Cosmetology, Athens GA, 2008

GEORGIA STATE UNIVERSITY: Atlanta GA, 2013 -

COMMUNITY

WOMEN WHO CODE: Member since 2015.

GIRL DEVELOP IT: Member since 2015.

WOODMENLIFE CHAPTER 2002: Secretary, 2015 - Present
